“

I turn ideas into intuitive interfaces and code into seamless user experiences.

ABOUT ME

Creative and detail-driven UI/UX and Front-End Developer with a Bachelor of Library and Information Science background, bringing a unique strength in organizing information into intuitive digital experiences. Skilled in building clean, responsive, and user-friendly interfaces using HTML, CSS, and JavaScript, with a strong focus on usability, design clarity, and functionality.

EXPERIENCE

National Library of the Philippines

Library Assistant (August 2025)

- Created promotional videos and outreach materials
- Conducted inventory, cataloging, and encoding of donated books
- Assisted clients and organized library materials

STI College Malolos

Library Assistant (January 2026)

- Organized enrollment slips, exam papers, and library documents
- Shelved, labeled, and conducted inventory of books
- Assisted students and managed library materials

PROJECTS

Thorworkz Autoparts

E-commerce Website

- Designed wireframes and prototypes to plan the layout and user flow.
- Created the UI/UX design ensuring a clean and user-friendly experience.
- Implemented key features including product browsing, shopping cart, and user authentication.

GEAN Library

Library System

- Designed front-end UI & UX implementation and interaction design.
- Documented application features and user interactions to support team coordination.

ANVIS DESIGNERY

Architectural Website

- Designed and developed a static customer-facing website to showcase best-selling items, business information, operating hours, and contact details.
